WORK EXPERIENCE

UI UX Designer | Adobe Creative Jam [↗](#)

Vancouver, BC • June 2020 - Present

- Sketched, designed and prototyped a fully working web app UI on XD called “Reel” for Adobe Creative Jam competition.
- Secured 25th place among 3000 participants with a full design rating.

Creative Design Team Lead | SFU Surge [↗](#)

Vancouver, BC • September 2020 - Present

- Lead my Creative team in the user-centred design process of researching, specifying user’s needs, designing, and evaluating before working with devs on The Productivity App.
- Presented 5 elements of UX design to my peers which resulted in effective communication and ease in development process.
- Implemented strong visual design, suitable typography, and minimal icons with designing for equity in mind.
- Sketched, created wireframes, implemented assets in mockups, and prototyped before exporting high quality code and assets.

Front-end Web Developer | Freelancing

Vancouver, BC • December 2020 - Present

- Developed and updated three different dynamic website over the last three years using HTML, CSS, and Javascript.
- Crafted complex websites using web frameworks (React & Node), to develop my personal website, Notes Of Tomorrow, and my father’s clothing business website which resulted in more engagement with buyers from different brands and building trust from reviews.

Programming Instructor | Maple Leaf Int. School

Dhaka, Bangladesh • March 2018 - September 2018

- Founded IT Club in high-school and created course modules and lectures which helped student study the material.
- Tutored Web Development & Introduction to Python programming to almost 300 students ranging from class VI - IX.
- All of these resulted in a 80% increase in class engagement, participation in Hackathons and broaden their interest in newer fields of study.

PROJECTS

Web Application | BudgeTea [↗](#)

Dhaka, Bangladesh • February 2021

- Developed a web application purely with HTML, CSS, and JS, that lets user to calculate their budget by taking user input for both income and expense.
- Implemented user-centric psychology to design and add colours, fonts, whitespaces and forms, to display information.

Web Project | Pig Dice Game [↗](#)

Vancouver, BC • January 2021

- Created a web-based game called pig-dice game using HTML, CSS and JS.
- Designed the assets used in the game (board, dice, models).
- Exported and implemented the designed assets to code architecture and coded the entire logistics and game using a beautiful code structure.

Web Project | Notes Of Tomorrow [↗](#)

Vancouver, BC • December 2020

- Designed and prototyped a fully working web application and currently working on the codes.
- Built it as a hobby so that people can also visit and learn about things not taught in school & get free knowledge.

First Personal Website | Izazzubayer.github.io [↗](#)

Vancouver, BC • November 2018

- Created a responsive web portfolio using HTML, CSS, JS, React, and JQuery in 2018 and updated the UI every 6 months.
- Linked all my other social media platforms, resources, and other projects on the website.
- Debugged and tested the site numerous times before hosting it on Git.
